PROTECTION RELAY SERVICES & G10 PROTECTION SERVICES

- Installation
- Maintenance
- Repair
- Testing
- G10-installation, testing, witnessing
- Retrofit

We can test all types of relays including the following:

- Differential
- Directional
- Earth fault
- Earth leakage
- Over frequency
- Overcurrent
- Overvoltage
- Reverse power
- Synchronizer
- Thermal overcurrent
- Under frequency
- Undervoltage
- Auto reclosing

We can test in-built protection relays within circuit breakers and external protection relays. In order to keep the highest integrity of these protection devices, regular testing is essential. We are capable of testing all protection relays from the old induction disc type to the modern multifunctional electronic relays.

- Alstom
